

SB11277 - Multimedia Systems and Technologies – Project

Welcome to the game, a fun and addictive game created using Adobe Flash CS3. This documentation will guide you through the setup, gameplay, and customization options of the game.

- **Getting Started:**

To play the game, follow these steps:

1- Open Adobe Flash CS3, (you need it to be installed in your device).

2- From the main screen select open

3- Select Abdallah's Project (**FLA**) to edit the game, and Abdallah's Project (**SWF**) to play it directly.

- **Gameplay:**

This game is a classic arcade-style game where you control a character and dodge obstacles and collect coins to earn points. **Use the arrow keys to move your character left and right and the up arrow to jump**, avoiding collisions with obstacles.

- **Architecture:**

This Game is built using Adobe Flash CS3, utilizing ActionScript for game logic and animation. The game consists of multiple frames, each representing a different game state (e.g., stage1, stage2, game over, end).

- The pictures of the character and the background and the music on the file Pictures.

- **Credits:**

Game concept and development by **Abdallah Makhatreh**.
Under the supervision of Professor **Tsvetozar Stefanov Georgiev**.
